HONG KONG HEIGHTS.....

Located atop the Prince's Building, socialite Bonnie Gokson's latest project Sevva (pronounced "savour"), launched earlier this year, is most notable for its stunning interior design and breathtaking, 360-degree views of the city and the harbor from its open-air balcony. Inside Gokson serves up an intriguing menu of mini-environments: the harbour side area offers "easy glamour", the bank side a more formal setting and pampered approach, the terrace lends itself to casual relaxation and the taste bar accommodates *tête-à-têtes* and small plates. www.sevvahk.com.....
